

RealityMine Connect

Streaming intelligence across all devices

With massive rates of consumer adoption, streaming has driven a permanent shift in content consumption. Investment in the sector has increased competition and giving consumers ever more choice over where and how they access content. The need to grow and retain audiences in this increasing competitive environment has forced streamers to adapt their range of subscription tiers and introduce new revenue generating ad-supported tiers. With advertiser dollars flowing in, the need for more comprehensive and trusted measurement is critical.

What Is It?

RealityMine Connect provides clients with access to verified content viewing data captured directly from user's accounts. Initiated through an interface within a client or white-label application, users can choose to connect their accounts and share their viewing data. Using a privacy first approach, user credentials do not leave the user's device and no other data is captured beyond what they watched, when they watched it, and for how long.

Why Use It?

1

Streaming Video Intelligence

- ✓ Content Performance
- ✓ Competitive & Market Intelligence
- ✓ Audience Understanding

2

Cross Platform, Cross Device

- ✓ High Frequency, Individual Level Viewing Data
- ✓ Collected Directly from Users' Accounts
- ✓ Not Self-Reported, No Recall Bias

3

Enrich Your Customer View

- ✓ Connect to First Party Data
- ✓ Identify Trends & Opportunities
- ✓ Close Data Gaps and Stay Ahead of the Competition

Which Devices Are Supported?

User consent and account connection is supported via a mobile application or SDK. This provides access to viewing data across all devices that are connected to that account.

Supported Platforms

- Amazon Prime Video
- Amazon Prime Channels (e.g. Paramount+)
- AppleTV+
- Discovery+
- Disney+
- Hulu
- iQIYI
- Max
- Netflix
- Paramount+
- Peacock
- Vidio (Indonesia)
- YouTube
- YouTube Shorts

Panellist Experience

RealityMine Connect is available as an SDK for integration into client and partner applications, as a branded white label, and is available today in the Play Store.

Users are invited to share their data, connect their accounts and the relevant profile by entering platform credentials and will be prompted to reconnect should any failure occur. No additional action is required from the user.
